Blank Level of Questions

Marion Blank studied the language used by teachers in the classroom. She found that there were four different levels of questions used. Basic questions ask for simple concrete information whereas more complex questions ask for abstract information.

Make sure the questions you use are at the level your child can understand. More difficult questions can be simplified or you can use the cueing techniques described overleaf to help the child respond.

These are the four levels and examples at each level are given on the following pages

- 1. **Matching perception 'look at it'** talking about objects that are present. Understanding of these questions develops at approximately 3 years of age.
- 2. **Selective analysis of perception 'talk about it'** talking about less obvious features of stimuli (objects, pictures etc.). Understanding of these questions develops at approximately 4 years of age.
- 3. **Reordering perception-** *'think about it'* talking about looking at objects in a variety of ways. Understanding of these questions develops at approximately 4.5 years of age.
- 4. **Reasoning about perception 'reasoning'** talking about what causes things to happen and make predications about future events based upon past experiences. Understanding of these questions begins to emerge at around 5 years of age and is continuing to develop at 6 years of age.

Blank Level I	
Matching	Find one like this
Source of noise	What can you hear?
Naming objects	What is it?
Naming people	Who is that?
Naming actions	What are you doing?
Imitation	Say this
Remembering objects in book	What did you see?
Remembering seen/done	What did you see/do?
Blan	k Level II
Describe scene	What's happened?
Remembering information	Who/what/where?
Finishing sentence	Finish this
Identify and describe	What size is it?
Identify and describe characteristics of objects	What shape?
	What shape? What colour?
	What shape? What colour? How many?
	What shape? What colour?

How are these different?

Tell me something that's a type of

Identifying differences

Naming object from category

Blank Level III	
Identify object used with another	Find me one to use with this
Describe event might happen	What will happen next?
Give directions	Tell me what to do
Assume role of another	What would/could/might he say?
Follow 2 stage directions	Do and then
Identify similarities	How are these the same?
Identify objects by exclusion	Which one is not?
Identify alternative	Tell me something else we could use
Change pictures in sequence	Make these into a story Show me the first/middle/last
Describe sequence of pictures logically	Tell me the story
Generalise about set of events	What happened to all of these?
Defining word	What is a

Blank Level IV	
What will happen if	
Why?	
Why did it happen?	
What could you do?	
Why can't we	
How can we tell?	
What could we use?	
Why should we use that?	
Why is made of?	

Cueing Techniques

If your child does not understand you, there are different ways you can help. These techniques help to scaffold your child's understanding and should be gradually dropped as your child's understanding improves. Try the following suggestions:

- *Give time* make sure you have given your child enough time to respond.
- **Delay** make sure your child has waited until you have finished your request.
- Focus attention make sure your child is looking at you and listening to your request.
- **Repeat** repeat the request again.
- **Simplify** break your request down into parts or make it simpler.
- **Use questions to clarify** check your child understands by asking him questions.
- Focus on the feature help your child focus on the feature he needs to look at to be able to understand your question (e.g. If you're asking how

Ref: Compiled by Therapy Focus, based on Information by Marion Blank

two items are alike, you can draw his attention to the relevant similarity like colour or size etc.).

•

• **Forced alternatives** – give your child two alternatives (e.g. "What is he doing? Is he running or jumping?").

•

• Sound/syllable cues – give the first sound or syllable of the answer.

•

• **Gesture** – use gesture to help your child understand or to cue him in to the correct answer.

•

Rephrase – repeat the request in a different way.

•

_

 Demonstration – show the answer without talking and then ask again (e.g. what would happen if we put water in this broken cup?" Demonstrate).

• **Experience** the concept - help the child to experience the answer (e.g. "How does it feel? Touch it.").

•

 Relate known to unknown – help child to relate the request to previous experiences (e.g. "The spaghetti is hard. How will it feel after it is cooked? Remember when we cooked the potatoes? How did they feel?").
